

RUDRANI SENAPATI

FULL STACK DEVELOPER

Bhubaneswar ♦ 9078929506 ♦ senapatirudrani@gmail.com ♦ LinkedIn ♦ GitHub

PROFESSIONAL SUMMARY

Full-Stack Web Developer with a strong foundation in the MERN stack (React 19, Node.js, Express, MongoDB), building scalable web applications with real-time data sync, JWT security, and third-party API integrations. Brings a professional background as a Test Engineer on Nokia telecom projects, validating LTE, VoLTE, and VoNR network signaling protocols through rigorous debugging and Linux scripting. Combines strong cross-functional collaboration with a quality-first engineering mindset to deliver clean, high-performance, thoroughly tested code.

WORK EXPERIENCE

Test Engineer | Everiion Tech

Nov 2025 – Present | Bhubaneswar

- ◆ Perform functional, integration, system, regression, and end-to-end (E2E) testing for LTE, IMS, VoLTE, VoWiFi, VoNR, and AAA network elements, in alignment with 3GPP standards.
- ◆ Diagnose and resolve critical network failures by examining SIP, Diameter, and RTP signaling flows using Wireshark and Linux-based tools.
- ◆ Review IMS Registration signaling (REGISTER, UAR/UAA, MAR/MAA, SAR/SAA) and VoLTE call setup/teardown flows (INVITE, PRACK, 180 Ringing, 183 Session Progress, ACK, BYE) across P-CSCF, I-CSCF, and S-CSCF to independently isolate root causes of call failures.
- ◆ Confirm EPC components (MME, SGW, PGW) during LTE Attach and session establishment, ensuring correct bearer setup and message exchange across the packet core.
- ◆ Streamline LTE Attach and IMS Registration procedures through Linux scripting, improving overall test efficiency.
- ◆ Assess large volumes of network logs using Wireshark and Linux command-line tools to identify top causes of system crashes and implement preventive fixes.
- ◆ Execute test cases per release cycle, log and monitor issues, and reduce average resolution time through systematic tracking and clear documentation.
- ◆ Collaborate with development and cross-functional engineering teams to ensure timely closure of issues and high-quality, on-time release deliverables.

Test Engineer | Odissi Tech Global Solutions

Jul 2025 – Nov 2025 | Bhubaneswar

- ◆ Built a strong foundation in LTE, VoLTE, VoWiFi, VoNR, and IMS network architecture through hands-on training and guided testing.
- ◆ Executed functional and regression test cases for telecom network elements, confirming LTE Attach procedure signaling (Identity Request/Response, Authentication, ESM Information, Create Session, Update Location, Attach Accept) between eNB, MME, SGW, and HSS.
- ◆ Gained practical knowledge of IMS core architecture including P-CSCF, I-CSCF, S-CSCF, and HSS, along with SIP call flow and messaging concepts.
- ◆ Examined packet captures using Wireshark to understand call setup and message exchange, assisting senior engineers in issue identification.
- ◆ Recorded defects, monitored test outcomes, and prepared test documentation for core network features, contributing to Nokia release validation activities.
- ◆ Helped lower critical defects prior to release through consistent and detail-oriented test execution.

PROJECT EXPERIENCE

VoLTE, VoNR & PACO Signaling Validation

Jul 2025 – Present

Nokia Telecom Project, Gurgaon

- ❖ Verified call continuity during VoLTE-to-VoNR handover scenarios across network transitions.
- ❖ Logged and tracked defects identified during PACO and VoLTE/VoNR testing cycles.
- ❖ Collaborated with development teams to confirm fixes before release.
- ❖ Executed regression test cases to ensure PACO updates didn't break existing call flows.
- ❖ Documented test results and prepared reports for release sign-off.

CarePulse – Full-Stack Telehealth & Clinical Management System

May 2025 – Jun 2025

MERN Stack | [GitHub](#) | [Live Demo](#)

- ❖ Architected a 3-tier enterprise healthcare platform supporting Patients, Doctors, and Hospital Admins with real-time slot scheduling across 12 medical specialities.
- ❖ Engineered live background state polling (10s auto-sync) enabling seamless real-time data updates across consultation queues without page reloads.
- ❖ Developed a client-side Health Vault PDF engine for printable E-Prescriptions with digital signatures, diagnosis notes, and integrated automated Twilio SMS booking reminders.

QuickGPT – AI-Powered Conversational Intelligence Platform

MERN Stack | [GitHub](#) | [Live Demo](#)

- ❖ Developed an Appointment Booking System using the MERN Stack (MongoDB, Express.js, React, Node.js).
- ❖ Implemented User Authentication, Appointment Scheduling, Calendar Integration, and Responsive UI.

TECHNICAL SKILLS

Frontend	JavaScript, Python, HTML, CSS, React 19, TailwindCSS, Framer Motion
Backend	Node.js, Express.js, REST APIs, JWT Auth, SQL
Databases	MongoDB, MySQL, Oracle
Technologies	LTE, IMS, EPC, VoLTE, VoWiFi, VoNR, PACO, PCRF, HSS, TAS, SBC, AAA, CFX, MRF
Testing	Functional, Integration, System, Regression & E2E Testing, Defect Tracking, Test Documentation
Protocols	SIP, SDP, RTP, Diameter, TCP/IP, UDP, DNS, 3GPP
Networking	TCP/IP & OSI Models, IPv4/IPv6, QoS, Default & Dedicated Bearers, LTE & IMS Architecture
Tools	Wireshark, MS Excel, Linux, Android Devices, Git, GitHub, Postman, VS Code

EDUCATION

Master of Computer Applications (MCA)

Jun 2025

Gandhi Institute For Education & Technology, Bhubaneswar

Bachelor of Science (B.Sc)

Jul 2023

Nimapara Autonomous College, Nimapada

CERTIFICATES

- ❖ Advanced Computer Networks — NPTEL, IIT Indore
- ❖ Advanced Computer Architecture — NPTEL, IIT Delhi
- ❖ Cloud Computing — NPTEL, IIT Kharagpur
- ❖ Internet of Things (IoT) — NPTEL, IIT Kharagpur
