PROFILE SUMMARY

Motivated and detail-oriented MCA graduate currently working as a **Test Engineer**, with a strong foundation in software testing and development. Skilled in identifying bugs, ensuring product quality, and improving software performance through systematic testing and analysis. Passionate about learning new technologies, enhancing automation skills, and contributing to high-quality software delivery. Eager to grow in a dynamic work environment and continue expanding my technical expertise.

EDUCATION

MCA, Gandhi Institute For Education & Technology 2025

Focused on software development and emerging technologies.

Bachelor of Science (B.Sc) from Nimapara Autonomous College, Nimapada. 2023

SKILLS

Languages	Core Java, HTML, CSS, JavaScript
Library	React
Database	SQL, MongoDB
Others	GitHub, VS Code, WIRESHARK

EXPERIENCE

Test Engineer — DKPL Networks Pvt. Ltd. (Nokia Partner)

Deployed through Odissitech Global Solutions Pvt. Ltd.

Location : Delhi/Gurgaon, Haryana | July 2025 – November 2025

Performed testing and validation of Nokia telecom network nodes (VoWiFi, LTE, VoNR, etc.). Executed functional, integration, and regression testing while collaborating with Nokia teams on test planning, execution, and documentation.

Test Engineer — DKPL Networks Pvt. Ltd. (Nokia Partner)

Deployed through Everiion Pvt. Ltd.

Location : Delhi/Gurgaon, Haryana | November 2025 – Present

Carried out extensive verification and validation of Nokia telecom network elements such as AAA, VoWiFi, LTE, VoNR, and IMS. Performed end-to-end functional, system integration, and regression testing to ensure reliability and seamless performance. Worked closely with cross-functional teams on test strategy, execution, reporting, and defect management, leveraging Wireshark, Linux environments, Jenkins automation, Jira tracking, and Excel-based analysis for effective quality control.

PROJECTS

Student Management System (MERN Stack)

- Developed a Student Management System using the MERN stack to manage student enrollment, records, and attendance.
- Implemented secure authentication, CRUD features, and an interactive dashboard for analytics.

Appointment Booking System (MERN Stack)

- Developed an Appointment Booking System using the MERN stack for scheduling appointments with professionals or services.
- Implemented user registration, calendar integration, and notification features with a responsive, user-friendly interface.

CERTIFICATION

- Internet of Things (IoT): NPTEL, IIT Kharagpur
- Cloud Computing: NPTEL, IIT Kharagpur
- Advanced Computer Architecture: NPTEL, IIT Delhi
- Advanced Computer Networks - NPTEL, IIT Indore
